Schedule of Events from Birth to Spay or Neuter

- * Each vaccination should ideally be given at three week intervals.
- ** The time to begin heartworm medication can vary depending on the product and time of year.
- *** The de-worming product selected at this time can vary depending on the type of heartworm prevention that is used. In general, Drontal or Drontal Plus are recommended.

See pages A622 and A905 for parasite control and vaccination suggestions.
